

Module title	Nutrition and Nutrition Related Chronic Diseases
Code	F2
Degree Programme	Master of Science in Life Sciences
Group	Food
Workload	3 ECTS (90 student working hours: 42 lessons contact = 32 h; 58 h self-study)
Module Coordinator	<p>Name: Janice Sych Phone: +41 (0)58 934 59 90 E-Mail: janice.sych@zhaw.ch Address: ZHAW Life Sciences und Facility Management, Einsiedlerstrasse 34, 8820 Wädenswil</p>
Lecturers	<ul style="list-style-type: none"> • Dr. Janice Sych, ZHAW • Dr. David Fäh, BFH • Dr. Samuel Mettler, BFH • Guest speaker(s) / Assistant(s) to be announced
Entry requirements	At least one module at bachelor level with nutrition-related contents and one with basic statistics.
Learning outcomes and competences	<p>After completing the module, students will be able to:</p> <ul style="list-style-type: none"> • Summarize main characteristics and impacts of nutrition-related chronic diseases (the 4 main NCDs). • Describe the main characteristics of healthy versus unhealthy diets; nutritional recommendations and what people actually eat; and key determinants of dietary behaviour and health. • Critically discuss the evidence linking diet (nutrition-related exposures) with increased or decreased risk of NCDs, and the different perspectives on physical activity / inactivity. • Identify and assemble in a diagram the most important factors contributing to NCDs and discuss their interactions. • Propose new approaches to tackle NCDs and promote health.
Module contents	<p>The course aims to develop an understanding about the role of diet in maintaining health and preventing disease, considering the four major NCDs. A holistic approach will be promoted as students explore the following topics:</p> <ul style="list-style-type: none"> • Healthy/unhealthy diet; dietary patterns versus food group /nutrient-focus; new approaches to dietary assessment; health effects of bioactives. • Basic theory for selected NCDs (obesity, diabetes type 2, cardiovascular diseases, specific types of cancer). • Physical activity / inactivity and health outcomes. • Some insights about the microbiome as related to NCDs. • Basic terminology in nutrition epidemiology (study designs; levels of evidence and causation) and public health.
Teaching / learning methods	<p>Lecture and assignments, emphasizing critical thinking and student-centered learning</p> <ul style="list-style-type: none"> • Pre-course slide casts and readings, must be completed before the course. • Individual / group activities, based on theory and readings
Assessment of learning outcome	<ol style="list-style-type: none"> 1. Written final exam: 40 % - closed book 2. Group project: 60 %

Master in Life Sciences

A cooperation between
BFH, FHNW, HES-SO, ZFH

Format	Block week																								
Timing of the module	Winter school CW 6
