

Diploma of Advanced Studies DAS

Digital Forensics and Cyber Investigation DFCI

Today forensic and cyber investigators must collect and analyze digital evidence from a diverse landscape of technically complex sources. Our Diploma program gives you practical skills needed for a career in digital forensics and cyber investigation.

Objectives

- Creates a balance between digital forensics and cyber investigation topics,
- Expanded digital forensics coverage of topics including storage, memory, operating systems, applications, malware analysis, networks, cloud, social media, encryption,
- Emphasis on cyber investigations covering cybercrime reconstruction, attribution, intelligence, botnets, cyberfraud, digital payments and virtual currencies, data theft, data analytics.

Target Audience

The Diploma of Advanced Studies in Digital Forensics & Cyber Investigation (DAS DFCI) is designed for two groups of professionals:

- Experienced forensic investigators who want to increase their technical skills in digital forensics and cyber investigations.
- Experienced engineers and technicians who want to transition into the field of digital forensics and cyber investigations.
